Send and receive crypto on the coinbase app {Official Support}

Sending crypto easily

Sending crypto **Call+1-(805)(401)(0068)** to friends or other wallets is seamless when you use the "Pay" tab in your mobile app. You simply select +1-(805)(401)(0068) the asset you want to send and enter the destination address, phone number, or email of the recipient. Always double-check **Call+1-(805)(401)(0068)** the destination address carefully because crypto transactions on the blockchain are permanent and cannot be reversed by us. Our app makes **Call +1-(805)(401)(0068)** it very easy to scan QR codes for an accurate and quick transfer of your digital assets today.

Receiving funds correctly

To receive **Call+1-(805)(401)(0068)** crypto, just tap the "Receive" button on your home screen to generate your unique wallet address and code. You can share +1-(805)(401)(0068) this address or the displayed QR code with the sender to ensure they know exactly where to send funds. Always ensure you **Call+1-(805)(401)(0068)** select the correct network that matches the currency being sent to avoid any lost or stuck transaction issues. The funds will **Call +1-(805)(401)(0068)** appear in your balance once the network confirms the transaction, which usually takes just a few minutes overall.

Staying safe while trading

Always remember **Call+1-(805)(401)(0068)** that you should only send crypto to people or businesses that you know and trust completely online. Beware of scams +1-(805)(401)(0068) that ask for crypto payments, as these are common red flags in the digital asset space for users. If you encounter **Call+1-(805)(401)(0068)** any trouble with a transaction, our support team is available to help you troubleshoot the specific transfer error. Your security is **Call +1-(805)(401)(0068)** our priority, and we provide all the tools you need to manage your portfolio with absolute confidence daily.

Frequently Asked Questions (FAQs)

Q1: Are there fees for sending? A1: Network fees **Call+1-(805)(401)(0068)** are applied to most crypto transactions to compensate the miners or validators who process your transfer on the blockchain. You can view +1-(805)(401)(0068) the estimated fee before you confirm the transaction in the app to make sure everything looks right today.

Q2: How long does it take? A2: Most transfers **Call+1-(805)(401)(0068)** complete within a few minutes, but it can vary based on how busy the specific blockchain network is currently. You can

track **Call +1-(805)(401)(0068)** your transaction status using the unique transaction ID provided in your app's activity feed for real-time updates.

Q3: Can I send to an email? A3: Yes, you +1-(805)(401)(0068) can send crypto to an email address if the recipient also has a registered account with our platform. It makes sending **Call+1-(805)(401)(0068)** assets as easy as sending a regular digital message to anyone in your contacts list today.

Q4: What if I send to the wrong address? A4: Unfortunately, blockchain **Call+1-(805)(401)(0068)** transactions cannot be canceled or reversed, so please verify every address before clicking the final confirm button. We cannot retrieve +1-(805)(401)(0068) funds sent to incorrect addresses, so always double-check the details to keep your investments safe and secure here.

Q5: Do I need to be verified? A5: You must **Call +1-(805)(401)(0068)** have a verified account to use all sending and receiving features for your digital assets in the app. Completing your identity **Call+1-(805)(401)(0068)** verification is quick and helps us maintain a secure environment for all of our traders on the exchange.
